OS Lab Assignment - 12

```
Submitted By -: Priyanshu Vishwakarma
Section -: C
Roll No. -: 31
Subject -: Operating System Lab (BCSC 0803)
Submitted To -: Ms. Nidhi
NOTE: Github link for Script
```

Write the shell script to take file name as input and if the file exists then print the number of lines and also print 10th line of that file.

```
# !/usr/bin/bash
# For run this shell script use this syntax "sh Num_Line.sh"
# Write the shell script to take file name as input and if the file exists then
# number of lines and also print 10 th line of that file.
# This command for clear all running statement in terminal
clear
echo "-----"
echo "\t Print number of lines & Print 10th line"
# Enter File name for see result
read -p "File Name : " File_Name
echo
# Make sure file exist
if [ ! -f $File_Name ]
then
     echo "$File_Name not exist."
     echo "-----
     exit 1  # If condition is true then exit the script
fi
____"
```

```
# use cat command for display file content
cat $File_Name
echo "-----
# wc command for display number of line
w=$(wc -1 $File_Name)
echo "Number of lines : $w (File Name)"
echo "-----
____"
# use sed command for display 10th line
s=$(sed -n '10p' $File_Name)
echo "10th Line : "
echo
echo $s
echo "-----
echo
echo "Thank Yoy !"
```

OUTPUT:

```
Q : _ = x
                                                                                                                    root@kali: /home/ldrago/Desktop/BASH
                      Print number of lines & Print 10th line
